Regulation for jumping with Aerodyne Icon containers at Skydive Empuriabrava

Conditions to be met. In connection with the Aerodyne Service Bulletin and the corresponding modifications to the container system, we have established the following regulations for jumping with Aerodyne Icon containers at Skydive Empuriabrava.

1. Aerodyne, manufacturer of the ICON container, released on April 30 service bulletin SB300426. This service bulletin mandates a change to the AAD cutter placement for ICON rigs, sizes 1-5. All modifications must be performed by a qualified and appropriately rated rigger in accordance with manufacturer-approved procedures.

   Jumpers using affected ICON rigs sizes 1–5 must complete this modification before their next jump. Equipment identified in this service bulletin must have the modifications completed by a qualified rigger and documented accordingly. For more information, see Aerodyne Service Bulletin SB300426.

2. We, Skydive Empuriabrava, require (in addition to complying with the requirements of "Aerodyne Service Bulletin SB300426") the mandatory submission of this document, signed by a appropriately rated rigger. Bring this signed document and the video of the reserve pull test with you for the gear gear-check which is part of our registration procedure. If you have already passed this year's gear check, show this signed document at the reception before your next jump.

_____

I, as qualified rigger confirm, that a videoed DEPLOYMENT FUNCTIONALLITY TEST on this container system has been performed. The test, which can be revised in video, resulted in a problem-free operation and has not shown a unusual behaviour.

Container serial number _____

Main canopy type and size contained for DEPLOYMENT FUNCTIONALLITY TEST

Type _____ Size _____ Line type _____

Reserve canopy type and size contained for DEPLOYMENT FUNCTIONALLITY TEST

Type _____ Size _____

AAD type contained for DEPLOYMENT FUNCTIONALLITY TEST

Brand _____ Model _____

Signed by qualified and appropriately rated rigger **DATE:** _____

_____ _____ _____
